Author Index (Vol. 34)

Adamus, G., Arendt, A. and Hargrave, P.A.
Genetic control of antibody response to bovine rhodopsin in mice: epitope mapping of rhodopsin structure (34) 89
Appel, S.H., see Tajti, J. (34) 143
Arendt, A., see Adamus, G. (34) 89
Ariga, T., see Lugaresi, A. (34) 69

Baggs, R.B., see Schiffer, R.B. (34) 229
Barluzzi, R., see Blasi, E. (34) 53
Bergsteinsdottir, K., Kingston, A., Mirsky, R. and Jessen, K.R.
Rat Schwann cells produce interleukin-1 (34) 15
Bistoni, F., see Blasi, E. (34) 53
Björk, J., see Correale, J. (34) 109
Blasi, E., Mazzolla, R., Barluzzi, R. and Bistoni, F.
Microglial cell-mediated anti-*Candida* activity: temperature, ions, protein kinase C as crucial elements (34) 53
Bodmer, S., Huber, D., Heid, I. and Fontana, A.
Human glioblastoma cell derived transforming growth factor-β2: evidence for secretion of both high and low molecular weight biologically active forms (34) 33

Cambon-Thomsen, A., see Roth, M.-P. (34) 215
Cammer, W. and Zhang, H.
Comparison of immunocytochemical staining of astrocytes, oligodendrocytes, and myelinated fibers in the brains of carbonic anhydrase II-deficient mice and normal littermates (34) 81
Clanet, M., see Roth, M.-P. (34) 215
Coons, W.J., Vorhies, R.W. and Johnson, T.C.
An immune cell population that responds to β-endorphin and is responsible for protecting nude mice from the fatal consequences of a virus infection of the central nervous system (34) 133
Coppin, H., see Roth, M.-P. (34) 215
Corbo, M., see Lugaresi, A. (34) 69
Correale, J., Olsson, T., Björk, J., Smedegård, G., Höjeberg, B. and Link, H.
Sulfasalazine aggravates experimental autoimmune encephalomyelitis and causes an increase in the number of autoreactive T cells (34) 109
Cronin, M., see Walsh, F.S. (34) 43

Day, M.J., Tse, A. and Mason, D.W.
The refractory phase of experimental allergic encephalomyelitis in the Lewis rat is antigen specific in its induction but not in its effect (34) 197
Descoins, P., see Roth, M.-P. (34) 215
Dicou, E., Nerrière, V. and Labropoulou, V.
Naturally occurring antibodies against nerve growth factor in human and rabbit sera: comparison between control and herpes simplex virus-infected patients (34) 153
Doherty, P., see Walsh, F.S. (34) 43

Ekelund, P., see Tarkowski, E. (34) 61

Felgenhauer, K., see Neumann, B. (34) 173
Fesenmeier, J.T., Whitaker, J.N., Herman, P.K. and Walker, D.P.
Cerebrospinal fluid levels of myelin basic protein-like material and soluble interleukin-2 receptor in multiple sclerosis (34) 77
Fontana, A., see Bodmer, S. (34) 33

Gaulton, G.N., see Korostoff, J.M. (34) 1
Gautam, A.M. and Glynn, P.
Competitive dissociation of encephalitogenic complexes between antigen presenting cells and myelin basic protein (34) 25
Glynn, P., see Gautam, A.M. (34) 25

Hamaguchi, K., Ohno, R., Tsuji, T., Yamashita, T., Negishi, T., Nomura, K. and Hosokawa, T.
Activated T lymphocyte subsets in experimental allergic neuritis (34) 191
Hargrave, P.A., see Adamus, G. (34) 89
Hays, A.P., see Lugaresi, A. (34) 69
Heid, I., see Bodmer, S. (34) 33
Henneberg, A., Mayle, D.M. and Kornhuber, H.H.
Antibodies to brain tissue in sera of patients with chronic progressive multiple sclerosis (34) 223
Herman, P.K., see Fesenmeier, J.T. (34) 77
Höjeberg, B., see Correale, J. (34) 109
Hosokawa, T., see Hamaguchi, K. (34) 191
Huber, D., see Bodmer, S. (34) 33
Hughes, R.A.C., see Walsh, F.S. (34) 43

Jessen, K.R., see Bergsteinsdottir, K. (34) 15
Johnson, T.C., see Coons, W.J. (34) 133

Kiefer, R. and Kreutzberg, G.W.
Effects of dexamethasone on microglial activation in vivo: selective downregulation of major histocompatibility complex class II expression in regenerating facial nucleus (34) 99
Kingston, A., see Bergsteinsdottir, K. (34) 15
Koblar, S., see Walsh, F.S. (34) 43

Kornhuber, H.H., see Henneberg, A. (34) 223
Korostoff, J.M., Nakada, M.T., Markman, J.F. and Gaulton, G.N.
Impaired immune responsiveness is an essential component in persistent central nervous system infection with gross murine leukemia virus (34) 1
Kreutzberg, G.W., see Kiefer, R. (34) 99
Kuroda, Y. and Shimamoto, Y.
Human tumor necrosis factor-α augments experimental allergic encephalomyelitis in rats (34) 159

Labropoulou, V., see Dicou, E. (34) 153
Lampson, L.A., see Sethna, M.P. (34) 121
Latov, N., see Lugaresi, A. (34) 69
Leon, A., see Walsh, F.S. (34) 43
Link, H., see Correale, J. (34) 109
Lugaresi, A., Corbo, M., Thomas, F.P., Miyatani, N., Ariga, T., Yu, R.K., Hays, A.P. and Latov, N.
Identification of glycoconjugates which are targets for anti-Gal(β1–3)GalNAc autoantibodies in spinal motor neurons (34) 69

Markman, J.F., see Korostoff, J.M. (34) 1
Mason, D.W., see Day, M.J. (34) 197
Mayle, D.M., see Henneberg, A. (34) 223
Mazzolla, R., see Blasi, E. (34) 53
Mirsky, R., see Bergsteinsdottir, K. (34) 15
Miyatani, N., see Lugaresi, A. (34) 69
Moynihan, J.A., see Schiffer, R.B. (34) 229

Nakada, M.T., see Korostoff, J.M. (34) 1
Negishi, T., see Hamaguchi, K. (34) 191
Nerrière, V., see Dicou, E. (34) 153
Neumann, B., Ritter, K. and Felgenhauer, K.
Immunoblot for densitometric estimation of antibodies (IDEA): a useful method for quantification of intrathecally produced antibodies against individual antigens in infectious diseases of the central nervous system (34) 173
Nomura, K., see Hamaguchi, K. (34) 191

Ohno, R., see Hamaguchi, K. (34) 191
Olsson, T., see Correale, J. (34) 109

Rinner, I. and Schauenstein, K.
The parasympathetic nervous system takes part in the immuno–neuroendocrine dialogue (34) 165
Ritter, K., see Neumann, B. (34) 173
Roth, M.-P., Coppin, H., Descoins, P., Ruidavets, J.-B., Cambon-Thomsen, A. and Clanet, M.
HLA-DPB1 gene polymorphism and multiple sclerosis: a large case-control study in the southwest of France (34) 215
Ruidavets, J.-B., see Roth, M.-P. (34) 215

Schauenstein, K., see Rinner, I. (34) 165
Schiffer, R.B., Sunderman, Jr., F.W., Baggs, R.B. and Moynihan, J.A.
The effects of exposure to dietary nickel and zinc upon humoral and cellular immunity in SJL mice (34) 229
Sethna, M.P. and Lampson, L.A.
Immune modulation within the brain: recruitment of inflammatory cells and increased major histocompatibility antigen expression following intracerebral injection of interferon-γ (34) 121
Shimamoto, Y., see Kuroda, Y. (34) 159
Smedegård, G., see Correale, J. (34) 109
Sriram, S., see Su, X.-m. (34) 181
Stefani, E., see Tajti, J. (34) 143
Su, X.-m. and Sriram, S.
Treatment of chronic relapsing experimental allergic encephalomyelitis with the intravenous administration of splenocytes coupled to encephalitogenic peptide 91–103 of myelin basic protein (34) 181
Sun, D.
Enhanced interferon-γ-induced Ia-antigen expression by glial cells after previous exposure to this cytokine (34) 205
Sunderman, Jr., F.W., see Schiffer, R.B. (34) 229

Tajti, J., Stefani, E. and Appel, S.H.
Cyclophosphamide alters the clinical and pathological expression of experimental autoimmune gray matter disease (34) 143
Tarkowski, A., see Tarkowski, E. (34) 61
Tarkowski, E., Ekelund, P. and Tarkowski, A.
Enhancement of antigen-specific T-cell reactivity on the affected side in stroke patients (34) 61
Thomas, F.P., see Lugaresi, A. (34) 69
Tridente, G.
Second Conference of the Italian National Group for Neuroimmunology (GNI). Rome, Italy, 6–7 April 1990 (34) 241
Tse, A., see Day, M.J. (34) 197
Tsuji, T., see Hamaguchi, K. (34) 191

Vorhies, R.W., see Coons, W.J. (34) 133

Walker, D.P., see Fesenmeier, J.T. (34) 77
Walsh, F.S., Cronin, M., Koblar, S., Doherty, P., Winer, J., Leon, A. and Hughes, R.A.C.
Association between glycoconjugate antibodies and Campylobacter infection in patients with Guillain-Barré syndrome (34) 43
Whitaker, J.N., see Fesenmeier, J.T. (34) 77
Winer, J., see Walsh, F.S. (34) 43

Yamashita, T., see Hamaguchi, K. (34) 191
Yu, R.K., see Lugaresi, A. (34) 69

Zhang, H., see Cammer, W. (34) 81

Subject Index (Vol. 34)

Activated CD4$^+$ T cell
Experimental allergic neuritis; Two-color immunofluorescence flow cytometry; Activated CD8$^+$ T cell (Hamaguchi, K. (34) 191)

Activated CD8$^+$ T cell
Experimental allergic neuritis; Two-color immunofluorescence flow cytometry; Activated CD4$^+$ T cell (Hamaguchi, K. (34) 191)

Activity parameter
Multiple sclerosis; Autoantibody (Henneberg, A. (34) 223)

Antibody
Ganglioside; Guillain-Barré syndrome; Campylobacter (Walsh, F.S. (34) 43)

Ganglioside; Glycoprotein; Gal(β1–3)GalNAc; Motor neuron; Autoimmunity (Lugaresi, A. (34) 69)

Antibody response
Rhodopsin; Epitope mapping; Genetic control; Major histocompatibility complex; (Mouse) (Adamus, G. (34) 89)

Anti-*Candida* activity
Microglia; Protein kinase; Divalent ion concentration (Blasi, E. (34) 53)

Antigen competition
Experimental autoimmune encephalomyelitis; Antigen presentation; Myelin basic protein (Gautam, A.M. (34) 25)

Antigen presentation
Experimental autoimmune encephalomyelitis; Antigen competition; Myelin basic protein (Gautam, A.M. (34) 25)

Antigen-presenting cell
Class II major histocompatibility complex antigen; Experimental autoimmune encephalomyelitis; Glial cell; Interferon-γ (Sun, D. (34) 205)

Astrocyte
Carbonic anhydrase; Oligodendrocyte; Myelin; Glial fibrillary acidic protein; 2′,3′-Cyclic nucleotide-3′-phosphohydrolase (Cammer, W. (34) 81)

Autoantibody
Nerve growth factor; Serum; Herpes simplex virus infection (Dicou, E. (34) 153)

Multiple sclerosis; Activity parameter (Henneberg, A. (34) 223)

Autoimmunity
Ganglioside; Glycoprotein; Gal(β1–3)GalNAc; Motor neuron; Antibody (Lugaresi, A. (34) 69)

B lymphocyte
Stroke; T lymphocyte; Delayed-type hypersensitivity; Motor deficit; Sensory deficit (Tarkowski, E. (34) 61)

Campylobacter
Ganglioside; Guillain-Barré syndrome; Antibody (Walsh, F.S. (34) 43)

Carbonic anhydrase
Oligodendrocyte; Astrocyte; Myelin; Glial fibrillary acidic protein; 2′,3′-Cyclic nucleotide-3′-phosphohydrolase (Cammer, W. (34) 81)

Central nervous system
Retrovirus; Immunologic tolerance; Viral persistence (Korostoff, J.M. (34) 1)

Central nervous system disease
Endorphin-β; Nalaxone; Opioid; Lymphocyte; (Nude mouse) (Coons, W.J. (34) 133)

Class II major histocompatibility complex antigen
Antigen-presenting cell; Experimental autoimmune encephalomyelitis; Glial cell; Interferon-γ (Sun, D. (34) 205)

2′,3′-Cyclic nucleotide-3′-phosphohydrolase
Carbonic anhydrase; Oligodendrocyte; Astrocyte; Myelin; Glial fibrillary acidic protein (Cammer, W. (34) 81)

Cyclophosphamide
Motoneuron destruction, immune-mediated; (Guinea pig) (Tajti, J. (34) 143)

Delayed-type hypersensitivity
Stroke; T lymphocyte; B lymphocyte; Motor deficit; Sensory deficit (Tarkowski, E. (34) 61)

Densitometric quantification
Immunoblot; Intrathecally produced antibody (Neumann, B. (34) 173)

Divalent ion concentration
Microglia; Anti-*Candida* activity; Protein kinase (Blasi, E. (34) 53)

Endorphin-β
Central nervous system disease; Nalaxone; Opioid; Lymphocyte; (Nude mouse) (Coons, W.J. (34) 133)

Epitope mapping
Rhodopsin; Antibody response; Genetic control; Major histocompatibility complex; (Mouse) (Adamus, G. (34) 89)

Experimental allergic encephalomyelitis
Tumor necrosis factor-α; Human recombinant tumor necrosis factor-α; (Lewis rat) (Kuroda, Y. (34) 159)

Myelin basic protein; Tolerance (Su, X.-m. (34) 181)

Suppression; Refractory phase (Day, M.J. (34) 197)

Experimental allergic neuritis
Two-color immunofluorescence flow cytometry; Activated $CD4^+$ T cell; Activated $CD8^+$ T cell (Hamaguchi, K. (34) 191)

Experimental autoimmune encephalomyelitis
Antigen presentation; Antigen competition; Myelin basic protein (Gautam, A.M. (34) 25)

Antigen-presenting cell; Class II major histocompatibility complex antigen; Glial cell; Interferon-γ (Sun, D. (34) 205)

Gal(β1–3)GalNAc
Ganglioside; Glycoprotein; Motor neuron; Autoimmunity; Antibody (Lugaresi, A. (34) 69)

Ganglioside
Guillain-Barré syndrome; Antibody; Campylobacter (Walsh, F.S. (34) 43)

Glycoprotein; Gal(β1–3)GalNAc; Motor neuron; Autoimmunity; Antibody (Lugaresi, A. (34) 69)

Gene polymorphism
Multiple sclerosis; HLA-DP; Oligonucleotide typing (Roth, M.-P. (34) 215)

Genetic control
Rhodopsin; Antibody response; Epitope mapping; Major histocompatibility complex; (Mouse) (Adamus, G. (34) 89)

Glial cell
Interleukin-1; Schwann cell; Nervous system; Immune response; *Mycobacterium leprae* (Bergsteinsdottir, K. (34) 15)

Antigen-presenting cell; Class II major histocompatibility complex antigen; Experimental autoimmune encephalomyelitis; Interferon-γ (Sun, D. (34) 205)

Glial fibrillary acidic protein
Carbonic anhydrase; Oligodendrocyte; Astrocyte; Myelin; 2′,3′-Cyclic nucleotide-3′-phosphohydrolase (Cammer, W. (34) 81)

Glioblastoma cell
Immunosuppression; Transforming growth factor-β (Bodmer, S. (34) 33)

Glycoprotein
Ganglioside; Gal(β1–3)GalNAc; Motor neuron; Autoimmunity; Antibody (Lugaresi, A. (34) 69)

Guillain-Barré syndrome
Ganglioside; Antibody; Campylobacter (Walsh, F.S. (34) 43)

Herpes simplex virus infection
Nerve growth factor; Autoantibody; Serum (Dicou, E. (34) 153)

HLA-DP
Multiple sclerosis; Gene polymorphism; Oligonucleotide typing (Roth, M.-P. (34) 215)

Human recombinant tumor necrosis factor-α
Tumor necrosis factor-α; Experimental allergic encephalomyelitis; (Lewis rat) (Kuroda, Y. (34) 159)

Immune response
Interleukin-1; Schwann cell; Glial cell; Nervous system; *Mycobacterium leprae* (Bergsteinsdottir, K. (34) 15)

Immunity, cellular
Nickel, dietary; Zinc, dietary; Immunity, humoral; (SJL mouse) (Schiffer, R.B. (34) 229)

Immunity, humoral
Nickel, dietary; Zinc, dietary; Immunity, cellular; (SJL mouse) (Schiffer, R.B. (34) 229)

Immunoblot
Intrathecally produced antibody; Densitometric quantification (Neumann, B. (34) 173)

Immunologic tolerance
Retrovirus; Central nervous system; Viral persistence (Korostoff, J.M. (34) 1)

Immunopharmacology
Interferon-γ; Myelin basic protein (Correale, J. (34) 109)

Immunosuppression
Transforming growth factor-β; Glioblastoma cell (Bodmer, S. (34) 33)

Interferon-γ
Myelin basic protein; Immunopharmacology (Correale, J. (34) 109)

Intracerebral injection; Leukocyte recruitment; Major histocompatibility complex regulation (Sethna, M.P. (34) 121)

Antigen-presenting cell; Class II major histocompatibility complex antigen; Experimental autoimmune encephalomyelitis; Glial cell (Sun, D. (34) 205)

Interleukin-1
Schwann cell; Glial cell; Nervous system; Immune response; *Mycobacterium leprae* (Bergsteinsdottir, K. (34) 15)

Intracerebral injection
Interferon-γ; Leukocyte recruitment; Major histocompatibility complex regulation (Sethna, M.P. (34) 121)

Intrathecally produced antibody
Immunoblot; Densitometric quantification (Neumann, B. (34) 173)

Leukocyte recruitment
Interferon-γ; Intracerebral injection; Major histocompatibility complex regulation (Sethna, M.P. (34) 121)

Lymphocyte
Endorphin-β; Central nervous system disease; Nalaxone; Opioid; (Nude mouse) (Coons, W.J. (34) 133)

Major histocompatibility complex
Rhodopsin; Antibody response; Epitope mapping; Genetic control; (Mouse) (Adamus, G. (34) 89)

Major histocompatibility complex regulation
Interferon-γ; Intracerebral injection; Leukocyte recruitment (Sethna, M.P. (34) 121)

Microglia
Anti-*Candida* activity; Protein kinase; Divalent ion concentration (Blasi, E. (34) 53)

Motoneuron destruction, immune-mediated
Cyclophosphamide; (Guinea pig) (Tajti, J. (34) 143)

Motor deficit
Stroke; T lymphocyte; B lymphocyte; Delayed-type hypersensitivity; Sensory deficit (Tarkowski, E. (34) 61)

Motor neuron
Ganglioside; Glycoprotein; Gal(β1–3)GalNAc; Autoimmunity; Antibody (Lugaresi, A. (34) 69)

Multiple sclerosis
Myelin basic protein; Soluble interleukin-2 receptor (Fesenmeier, J.T. (34) 77)

HLA-DP; Gene polymorphism; Oligonucleotide typing (Roth, M.-P. (34) 215)

Autoantibody; Activity parameter (Henneberg, A. (34) 223)

Mycobacterium leprae
Interleukin-1; Schwann cell; Glial cell; Nervous system; Immune response (Bergsteinsdottir, K. (34) 15)

Myelin
Carbonic anhydrase; Oligodendrocyte; Astrocyte; Glial fibrillary acidic protein; 2′,3′-Cyclic nucleotide-3′-phosphohydrolase (Cammer, W. (34) 81)

Myelin basic protein
Experimental autoimmune encephalomyelitis; Antigen presentation; Antigen competition (Gautam, A.M. (34) 25)

Multiple sclerosis; Soluble interleukin-2 receptor (Fesenmeier, J.T. (34) 77)

Interferon-γ; Immunopharmacology (Correale, J. (34) 109)

Experimental allergic encephalomyelitis; Tolerance (Su, X.-m. (34) 181)

Nalaxone
Endorphin-β; Central nervous system disease; Opioid; Lymphocyte; (Nude mouse) (Coons, W.J. (34) 133)

Nerve growth factor
Autoantibody; Serum; Herpes simplex virus infection (Dicou, E. (34) 153)

Nervous system
Interleukin-1; Schwann cell; Glial cell; Immune response; *Mycobacterium leprae* (Bergsteinsdottir, K. (34) 15)

Neuroimmunomodulation
Parasympathetic nervous system (Rinner, I. (34) 165)

Nickel, dietary
Zinc, dietary; Immunity, humoral; Immunity, cellular; (SJL mouse) (Schiffer, R.B. (34) 229)

Oligodendrocyte
Carbonic anhydrase; Astrocyte; Myelin; Glial fibrillary acidic protein; 2′,3′-Cyclic nucleotide-3′-phosphohydrolase (Cammer, W. (34) 81)

Oligonucleotide typing
Multiple sclerosis; HLA-DP; Gene polymorphism (Roth, M.-P. (34) 215)

Opioid
Endorphin-β; Central nervous system disease; Nalaxone; Lymphocyte; (Nude mouse) (Coons, W.J. (34) 133)

Parasympathetic nervous system
Neuroimmunomodulation (Rinner, I. (34) 165)

Protein kinase
Microglia; Anti-*Candida* activity; Divalent ion concentration (Blasi, E. (34) 53)

Refractory phase
Suppression; Experimental allergic encephalomyelitis (Day, M.J. (34) 197)

Retrovirus
Immunologic tolerance; Central nervous system; Viral persistence (Korostoff, J.M. (34) 1)

Rhodopsin
Antibody response; Epitope mapping; Genetic control; Major histocompatibility complex; (Mouse) (Adamus, G. (34) 89)

Schwann cell
Interleukin-1; Glial cell; Nervous system; Immune response; *Mycobacterium leprae* (Bergsteinsdottir, K. (34) 15)

Sensory deficit
Stroke; T lymphocyte; B lymphocyte; Delayed-type hypersensitivity; Motor deficit (Tarkowski, E. (34) 61)

Serum
Nerve growth factor; Autoantibody; Herpes simplex virus infection (Dicou, E. (34) 153)

Soluble interleukin-2 receptor
Multiple sclerosis; Myelin basic protein (Fesenmeier, J.T. (34) 77)

Stroke
T lymphocyte; B lymphocyte; Delayed-type hypersensitivity; Motor deficit; Sensory deficit (Tarkowski, E. (34) 61)

Suppression
Refractory phase; Experimental allergic encephalomyelitis (Day, M.J. (34) 197)

T lymphocyte
Stroke; B lymphocyte; Delayed-type hypersensitivity; Motor deficit; Sensory deficit (Tarkowski, E. (34) 61)

Tolerance
Experimental allergic encephalomyelitis; Myelin basic protein (Su, X.-m. (34) 181)

Transforming growth factor-β
Immunosuppression; Glioblastoma cell (Bodmer, S. (34) 33)

Tumor necrosis factor-α
Human recombinant tumor necrosis factor-α; Experimental allergic encephalomyelitis; (Lewis rat) (Kuroda, Y. (34) 159)

Two-color immunofluorescence flow cytometry
Experimental allergic neuritis; Activated $CD4^+$ T cell; Activated $CD8^+$ T cell (Hamaguchi, K. (34) 191)

Viral persistence
Retrovirus; Immunologic tolerance; Central nervous system (Korostoff, J.M. (34) 1)

Zinc, dietary
Nickel, dietary; Immunity, humoral; Immunity, cellular; (SJL mouse) (Schiffer, R.B. (34) 229)

(Contents, continued from back cover)

HLA-DPB1 gene polymorphism and multiple sclerosis: a large case-control study in the southwest of France
M.-P. Roth, H. Coppin, P. Descoins, J.-B. Ruidavets, A. Cambon-Thomsen and M. Clanet (France) 215

Antibodies to brain tissue in sera of patients with chronic progressive multiple sclerosis
A. Henneberg, D.M. Mayle and H.H. Kornhuber (F.R.G.) 223

The effects of exposure to dietary nickel and zinc upon humoral and cellular immunity in SJL mice
R.B. Schiffer, F.W. Sunderman, Jr., R.B. Baggs and J.A. Moynihan (U.S.A.) 229

Abstracts
Second Conference of the Italian National Group for Neuroimmunology (GNI), Rome, Italy, 6–7 April 1990
G. Tridente (Italy) 241
